

## Dynamic Technology for Enhanced Intercom

A key element for communication with today's standards can fill the rift in varied technologies. Adding the AV LinkPro enhancement can integrate Crestron® connectivity to the largest diverse varieties of door intercom systems adding video intercom, paging and even trigger functions and events.

### It's how you get the message across:

- DoorBell Intercom through TSW.
- Intercom paging and sound system integration.
- AES67 or optional Dante audio
- Voicemail alerts and direct message playback.
- Video feed integration and manipulation.
- Retrofitting old analog with IP technology

With AV LinkPro you can add full video/audio intercom functions including video communication services. Door camera and intercom security stations can be interfaced into a total Crestron® scheme.

### Technically Speaking one AV LinkPro can provide

- AV Focused SIP PBX Server
- Full HD Video/Audio Intercom
- Video feeds from any IP source
- Music on hold features
- Voicemail and custom sound options
- 100% Crestron® RAVA SIP Compatible
