

# Dynamic Technology That Completes the Call

In many homes, telephones are a key element for communication with the outside world. Adding the AVLinkPro enhancement can integrate Crestron® connectivity to existing telephone systems adding intercom, touch screen calling, paging and even trigger functions and events.

## It's how you get the message across:

- DoorBell Intercom through Telephone.
- Intercom paging and sound system integration.
- Voice greeting alerts and direct message playback.
- Video telephone integration and manipulation.
- Full features wholehouse intercom
- Retrofitting old telephony with new technology

With AVLinkPro you can add full telephone functions including video telephone features. Door camera and intercom security stations can be interfaced into the total scheme.

## AVLinkPro SIP PBX Can Provide

- AV Focused SIP PBX VOIP Server
- Full HD Video/Audio Intercom
- Call management
- Music on hold features
- Voicemail and custom sound options
- Paging and room monitoring
- 100% Crestron® RAVA SIP Compatible
