

Dynamic Technology

That Completes the Call

In today's homes, various technologies provide key elements for communication with the outside world. The AVLinkPro SIP VOIP Bridge provides connectivity to audio and video telephone systems as well as intercom, touch screen calling, paging and can even trigger door locks, relays and control events.

It's how we get the message across:

- Door Bell Intercom through Telephone.
- Intercom paging and sound system integration.
- Voice greeting alerts and direct message playback.
- Video telephone integration and manipulation.
- Full features whole house intercom
- Paging with analog or digital (AES67) audio
- Multi zone broadcasting
- Retrofitting old telephones with new technology

With AVLinkPro you can add full telephone functions including video telephone features. Door camera and intercom security stations can be interfaced into the total scheme.

AVLinkPro SIP VOIP Bridge Provides:

- AV Focused SIP PBX VOIP Server
- Full HD Video/Audio Intercom
- Unicast video streaming
- Call management
- Music on hold features
- Voicemail and custom sound options
- Paging and room monitoring
- 100% Crestron® RAVA SIP Compatible
