

Manage Enhanced
Communication Technology

Now the combination of bridged SIP functionality along with video/audio security management are available in one powerful package. A powerful addition to overall video security.

The Power of 

The addition of the AVLinkPro™ SIP PBX state-of-the-art integration bridge allows many IP based SIP video communication systems to work in conjunction with RTSP and ONVIF cameras allowing full recording and montage viewing or everything. In addition, AVLinkPro™ Can stream video content to (NVR) network video recorders and trigger other systems to initiate tasks as well as intercom page to analog or multi-zone AES67 digital sound systems.
